Release Notes for the JCapper Build 198 Data Folder Mgr ONLY program download package published 12-31-2017:

What's Inside:

This download was compiled on 12-31-2017 and delivers a key program update that facilitates creating data folders for the New Year.

What's New:

The Data Folder Mgr - Beginning with all versions of JCapper published 12-31-2017 and later:

New MENU Item — The Data Folder Mgr in this program update contains a new MENU item labeled as "Create Data Folders for New Year" (without the quotes.)

To operate: Launch the DFM, click MENU, and select "Create Data Folders for New Year" (without the quotes.)

This will launch a new screen called the Year End Folder Creation Tool.

From here, click the Create Data Folders for New Year button — key in the 4 digit year for the new folder(s) you wish to create — then answer Yes at the confirmation prompt.

The interface will create a new set of folders for the 4 digit year that you keyed in — and display a detailed confirmation message at the end.

After installing this download:

Going forward, you will now be able to use the DFM to create data folders (in the recommended format) for each New Year. *Meaning that you no longer have to create them manually.*

Who Should Install This Download:

If you installed the 12-26-2017 FULL program update (but not the 12-31-2017 FULL program update) and you want to be able to use the DFM to create data folders (in the recommended format) for each New Year — or if

you simply want the latest published version of the DFM: *You should install this download ASAP.*

Install Instructions:

1. Close down all open JCapper program windows, log into the JCapper message board and navigate to the Build 198 program downloads page.

2. Save the Data Folder Mgr Only Special Download Package (published 12-31-2017) - filename: DataFolderMgrOnlyBuild198_12312017.exe to your hard drive. (Hint: c:\JCapperBuild is a good location to save it.)

3. Double click the download package file (filename: DataFolderMgrOnlyBuild198_12312017.exe) to run the extractor.

   The extractor will copy the .exe file for the Data Folder Mgr (and only the Data Folder Mgr) to your c:\JCapper\Exe folder, overwriting the existing .exe file for the Data Folder Mgr (filename: DataFolderMgr.exe) - and then on most machines, will launch the Data Folder Mgr.

That's It!

There's nothing else to install – and no import routines to run.

Enjoy,

-jp
