Special Download Package
UDM Wizard Only
April, 16 2015

What's Inside

UDM Wizard Only

This program download package contains the .exe file for the JCapper UDM Wizard only (and nothing else.)

Why publish a UDM Wizard ONLY program download package?

I am publishing this UDM Wizard only program download package because it enables me to deliver a current version UDM Wizard to members of the JCapper user community (who are running older versions of JCapper) without requiring them to undergo a full program install.

After installing this download package, and after launching the UDM Wizard, you should find that you can access newer features in the UDM Wizard such as:

1. Tagging your UDMs with a *tag or create date*.

2. Clicking the Find *Factors in Use Button* to generate a list of SQL UDMs where you are using factors that match your search criteria.

Install Instructions:

1. Close down all open JCapper program windows, log into the JCapper message board and go to the program downloads page.

2. Save the UDM Wizard Only Special Download Package (published April 16, 2015) - filename: UDMWizardOnly04162015.exe to your hard drive. (Hint: c:\JCapperBuild is a good location to save it.)

3. Double click the download package file (filename: UDMWizardOnly04162015.exe) to run the extractor. The extractor will copy the .exe file for the JCapper UDM Wizard (and

only the UDM Wizard) to your c:\JCapper\Exe folder, overwriting the existing .exe file for the UDM Wizard (filename: UDM_Wizard.exe) - and then on most machines, will launch the UDM Wizard.

That's It!

Enjoy,

-jp
